Request

Requesting that any bill passed that there be a curfew imposed on children under the age of 18 that are attending school which is mandated by law. Children do not belo in the streets over night. Statistics show tha there is a lot of violent crime in the 16 to 17 age brachet. I believe an 11 o'clock curfew is fair. Children need to be off the streets especially during school nights. This would enable more control of our children that us as parents are responsible for. I as a father of three I am very desappointed and frustrated. Law makers please help the parents in Connecticut have better control of our children, this curfew might or might not prevent another teen under the age of eighteen from losing there life to a violent gun crime or make bad choices that endanger society all around. The laws and agencies today are stressed with problem with these youths in this age brahet. Please law makers lets do something for the parent of Connecticut our hands are tied behind are backs, I have a right as a parent to know that I can keep my child home on a school night. This is the only way I can account for my child and his or her interests for there education and safety or others in societ
