Public Health Committee Wed 21 Feb 07

Re: 6977

We oppose bill 6977 for the following reasons:

The long term effects of the (HPV) vaccination are unknown.

It is not the role of government to mandate treatment for immoral conduct of our youth.

Parents have an obligation to protect, guide and educate our children to live moral lives. We need to show and teach our families to show respect for one another.

There is a program called True Love Waits available for education of parents and children.

Thank you.
