For the Environment Committee, concerning HR Bill # 6541 - hearing on Friday March 8, 2013

Please note that I understand your committee is considering changing the law to allow a short on-line computer course to take the place of classroom-based safe boating courses. That's the change in the law that is also is going to allow on-line training for firearms. This is a really bad idea in my opinion.

I think that this regulation change is being rushed - it is the first I heard of it. When I took my course in boating safety, I learned as much from the other students in the class, by the questions that they asked, and the interesting way that the teacher answered their questions. Some computers may be able to do this - but it doesn't sound as if this proposal will work that way.

There are lots of things to learn about boating that aren't in the book. If you are sitting at home with your PC, you just cannot "hear" what the other students are asking, and what the instructor is telling them. My teacher brought some "training aids" into the class - radios, ropes, charts ... How can students learning through a computer ever "see" what boating is about?

I STRONGLY oppose changing the regulations/laws regarding Boating Safety and Hunter Safety training at this time.

Thank you -

Sincerely,

Karen L. Baffa
