~~Attention~~: Senator Williams
Members of the Public
Health Committee

I Marcy Carmona are in support of Senate Bill 1. It is my hope that this bill is made available and receives the support needed in achieving its goals.

There are many things I hope to see in the improvement Health Insurance and care through this bill. Such examples are the improvement in quality of coverage, such as dental, and eye exams. Affordable plans, physicians care, and prescriptions coverage.

With todays economic changes and developments I find through my personal experiences that it is more and more difficult to maintain, and or even have a health plan. For example with my running my home daycare I do not have an available insurance, even with my best effort to try, and budget for one I'm afraid that I do not generate enough income to have one.

Please find enclosed my own personal testimony. It is my hope that it assists you in achieving our mutual goal in explain the great

need for this bill to be passed.

At the age of thirty-two I was diagnosed stage four, lymphatic cancer. My field of work at the time was in merchandising and due to the progression of my illness I was unable to maintain my position there by losing my Health Plan.

I at one point was recieving ssi, but had to discontinue and find a means of support to pay for my care and accumulating costs.

I as consequence entered the field of home care but are in despegate need of affordable health care. I do not make sufficient income and as a consequence I am unable to recive adaquate care and maintence to update current status, and-or neccessary treatments of any kind.

It an imperative need to many that this bill is passed not only for myself but for my grandson as well whom suffers with his own illness which is most difficult for the family to support with there minimal healthcare plan.

Thank again so much for you efforts.
They are and always be most appreciated
We here in our household do fully
support the availability of Bill 1.

yours truly,

Marcy Carmona
