Subject: SB123

CT citizens are tired of being ignored by a State government that constantly passes legislation which puts ourselves and our families at risk. In the past few years the Legislature and Governor has repealed the death penalty (against the wishes of 70% of CT residents), enacted an unpopular and dangerous prisoner early release program, and has recently undertaken to strip us of our 2nd amendment rights for self protection. Its time you folks in Hartford put the law abiding citizens of this State first instead of the criminals. Please pass SB123 and repeal the early release program.
