Senator Doyle,

I think raising the minimum wage is critical to sustain and revitalize our local economy. When employers pay their workers a higher wage, they have more flexible income to spend on businesses in their community.

My husband lost his job a few years ago. He went to the temp agency he worked for in college. The wage was the same. How is someone suppose to live off of wages from 20 years ago?

Senator, we need you to stand up for people & businesses in our community. Please support raising the minimum wage, and in the end, we will all benefit from it.

Thanks,

Kim Brown
