TESTIMONY OF **MAGGIE LITWIN** SUBMITTED TO THE STATE OF CT
APPROPRIATIONS AND HIGHER EDUCATION COMMITTEE ON FEBRUARY 15, 2017

H.B. No. 7027 - An Act Making Adjustments to State Expenditures for the Fiscal Year Ending June 30, 2017.

Co-Chairs, Ranking Members, and members of the Committee, I am a supporter of Southwestern Area Health Education Center (AHEC), Inc., and a resident of Orange.

My testimony is on behalf of maintaining the $400,643 CT AHEC Network line item in the 2016-2017 state budget. This will assure that the CT AHEC Network will be there to deliver its unique services and programs to our residents as we create the diverse, well trained and cost effective inter-professional healthcare workforce that Connecticut requires and deserves. It is important that the funds remain in the AHEC Bridgeport line item and not be consolidated into the UCHC funds.

The CT AHEC Network directly supports primary care workforce development in the state by "connecting students to careers in health, professionals to communities, and communities to better health." Funded since 1997, the CT AHEC Program provides state-wide services to more than 10,000 residents, annually (http://www.publichealth.uconn.edu/ct-ahec.html). As the demographics of the state continue to change, the primary care workforce must expand and respond to meet those changes. The CT AHEC Program is an invaluable resource to address these challenges at both a state and local level.

The CT AHEC Network utilizes federal, state and private funding to support:

- Inter-professional education and community based training programs for health professions students
- Promotion and retention of primary care providers in collaboration with state agencies
- Cultural competence and medical interpreting training to health professionals and trainees
- Dissemination and recruitment of health professional trainees in the National Health Service Corps
- Continuing medical education programs for public health and health care professionals
- Pipeline educational programs to raise awareness of health careers for pre-health professions learners

As part of the primary care workforce development in the state, the CT AHEC Program provides leadership for the State Innovation Model grant's Community Health Workforce Development and Integration (http://www.healthreform.ct.gov/ohri/site/default.asp), bringing collaborative stakeholders together to build infrastructure, policy and sustainability to the development of a Community Health Worker workforce in Connecticut. Likewise, CT AHEC's support of the Health Occupations and Technology Careers in Connecticut (HOT Guide) provides residents with an invaluable resource to learn about health and biotechnology careers and opportunities in the state (www.healthcareersinct.com).

Supported by federal, state and private dollars, the CT AHEC Program Office is located at UConn Health Center in Farmington, CT. The 4 regional AHEC Centers in collaboration with the AHEC Program Office extend UConn Health's reach state-wide. The CT AHEC Network responds to local needs and partnerships that address community health needs, including oral health, veteran's mental health, youth mental health first aid, teen health literacy, homeless and migrant farm worker access to health care.

I have been fortunate to be able to be a part of this organization's fundraising events, and have been able to lend my time as a volunteer periodically for 18 years, thus contributing to its important mission and its sustainability.

Thank you for your consideration of my testimony. Below is my contact information for your convenience.
