3-3-11

This program has helped me so much as a first time mom. Gwien has helped me through my fear of preganacy and delivery, To when my son was actually here. Helping me with his learning and development. I dont know what I would of done without this program as a first time mom. And I am happy to have her around untill my child turns five.

mom:
Nadia
Poole

for my second child, this program has also helped me out just as much as my first. I've learned that every child is different. And every child developes at there own pace. me and the kids love the fact that Gwien is around to help us with doctors, dentise, and other appoitments. And everything else that has to do with children. we love her visits and look foward to having her for the next four years.
