3/7/11

Dear Senator Doyle, Representative Taborsak and members of the Committee:

Re: HB6446
Concerning registration requirements of Public Service Techs and certified competitive service providers.

This letter is a request for your support of the above referenced legislation. I feel it is important that all employees of like services performed in customers' homes, be subject to the same licensing requirements.

As a consumer, it is important that people entering and doing work in my home, have the same minimum level of training and certification required by the State of CT for AT&T employees. Also, the revenue gained through requiring all technicians to be similarly licensed will be a much needed revenue gain for CT.
