To whom it may concern.

A change is needed in the workplace! I belong to a union and my contract states I have 10 days of pay replacement for sickness.

The problem is, if I use even 1 day I am being disciplined for being out sick. The Company claims it is a pattern if we argue it takes at least 3 different absences to create a pattern they ignore us.

I have seen people vomit in the trash can at their desk. Come in sick with strep throat or the flu or a severe cold or pink eye, all because they are in fear of loosing their job!

We need a bill passed so people are not in fear of loosing their jobs if they get sick FMLA, although good at helping someone with a sickness of 4 days or longer, doesn't help anyone for a day or two.

Thank You
