In Support of HB 5389 : Palliative Use of Marijuana

12:00 HB 5389 LOB Room 2D - 2A

My Name is Dan Montuori,

I am 47 yrs old. In 1990 I got Lyme disease. I was in Hospital for a wk before they figured out what I had. Sufferd with Arthritus.

IN 1994 I sufferd a neck injury that caused a kink in my spinal column. The lyme disease never went away. they called it chronic lyme disease of Fibromyalia. Arthritus from lyme.

My neck injury causes cluster Headaches and siezers. 1999 Doctors told me they would not sins papers saying I was ok to work. They Said ~~meds and~~ in 2000 med would keep me living but by 2005 I would have a stroke from the head aches. (Get living will) Enjoy life.!

They give me spinal taps to release presure. And knock me out with dilaudid. By 2001 I was on 11 differant meds inc. Nuerontin Skellaxon, Oxicodane, morphine, Alprozlan, Fentynal, celebrex, amptitriptalyne. A visiting Nurse had to come everyday to give me my doses. I weighed 89 lbs. By 2002 I had to stop taking meds my disision After not remembering wk end. I told doctor I kept taking pills after they add 12th medication. Doctor at least called to see if I had a reaction.

It took 6 months to wean off of meds but the side affects lasted for years. I still took low dose of perkesette and muscle relaxer + but by 2005-2006 I was having a siesur a WK. End of Road family came to say Goodbye. Nephew!

Nuronton

Thats when I got implant to stop seizers and head aches. But my ~~intestins~~ were ~~dy~~ dieing from perkacettes. ~~Had~~ Have wk walls from meds. I Had to stop! - By order of Gastrointesonal.

intestines

Doctor

A docter recomended I try ~~st~~ strong weed and since then I weegh 145 take how dose of fleyerall and Average one to two trips a yr to E.R. ~~Every Year I send my doc a pic of my but and tell him Im still here. And he is still my doctor.~~ I also work for myself reparing ~~Airs~~ Painthall Gun.

I was disfigured by a C.I. Not a user or a seller but an informat for Madison P.D. And they GAVE Him A.R.

I need a safer place to get it or grow it myself. One dispencery for each county but each self grower can sell to 3-5 people on a list. Some pain sufferers can not grow it themselfs.

Pain sufferers have two choices. Narcodics perscriptions is not one of them. You find a way to live with it or you Die.
