What Strive has done for me.

Strive has given me the confidence to go forward in my career. I was cycle 123/3 in 2012 and to be honest, it was a class of great difficulty. I struggle with habits that are difficult to break in 3 weeks and most these habits prevented me from employment. Becoming aware of these issues made me aware of the red flags employers see to not hire you. The convienence of Strive serving New Haven County residents means it's accessible to so many people looking to advance their careers. I even use Strive now to fax my timesheets to my employer, a service I can not afford on my own. I believe these are only an iceberg of reasons to keep Strive up and running. It is such a community oriented place; that if you take it away, you're taking away a very positive part of New Haven. My graduation date August 31st 2012 was the beginning of start of me finding my new career.
