1/11/13

Dear Senator Doyle,

I believe that in the state of our economy right now, that raising the minimum wage will give a boost to those families like ours who are having difficulties supporting their families due to medical situations. The work force can grow if we can afford to support our own families. Connecticut is a great place to reside but certainly not the cheapest to raise my family.

Thank you for taking the time to read this,

The Smith Family
