Dear mr. Chairman, Mar. 10, 2014

I am writing to support HB 5078, "the bill being heard that would delay the implementation of the common core." mr. Chairman every day my teacher would teach me all these things I didn't know, so I came home crying saying I wasn't smart. my mom hated seeing me cry and say I wasn't smart. So during summer I had to catch up on the things I didn't know. The next year I went to a different school it was hard, but my mom and dad knew it was the right thing for me. now I know I'm smart and I don't come home saying I'm not smart.

Sincerely,
Ellie Barrett
