My name is Margot Goldschmidt I'm a self-advocate and a member of people first. I live in willimantic CT. I receive 24 hours in house living support and support in day program. I get support from Network Inc. and Baroco. The support I receive is important to me in achieving my goals in life such as daily hygiene, transportion, cooking, toileting and helping with different activities such as arts and crafts that I love to do! Also having a relationship like another family. I feel if there are more cuts to the DDS budget it will hurt many people. I would be one person it would hurt to know the support I get could be taken away I would feel lonely and feel it would be harder to achieve my goals and live the life I would want to live. It's also hurting those that are trying to get the opportunity to live better lives and for familys to see their kids do well in life before they pass away. I would ask the legislators to restore fundings to DDS to help familiegs that are in need of living support and to keep the support that many of us need.
