SB229

My name is Meghan. Im 21 and a single parent. After having my kid I had to take time off work due to healing and trying to find child care. The time I took off I struggled due to the fact my job didnt want to pay me. Because I made a certain amount when I was working I wasnt eligible to recive state assistance. Passing the "paid while on maternity" leave would help alot of single struggling moms like myself so much. while getting paid on leave we wont fall back on bills, we wont need state assitance and it would give us a piece of mind knowing we have an income and can support our kids.
