Testimony for Govenor's Bill SB-16: OPPOSE

After hearing the Ned Lamont's press release last month, when he said there are "too many legal guns in Connecticut." That made me realize that all these "common sense gun laws" that this state has passed of the last 10-15 years, where always directed at the legal residents of this state. With all the hoops, fees, training, permit delays, renewal delays, firearm transfer delays and the hundreds of firearm laws on the books, already. You legislators will never stop. Connecticut has over 300,000 legal firearm permit holders, some may even be you. But you keep passing laws placing further restrictions on the good guys, in the name of stopping bad guys. Law makers that fall in-line with the Governor should not and will not get re-elected in November.

I Will Remember in November Voter!
