successor campaign treasurer of such candidate committee.

Sec. 5. (NEW) (Effective January 1, 2006) (a) Not later than October first in each year in which a state election, as defined in section 9-1 of the general statutes, is to be held, the Secretary of the State, in consultation with the State Elections Enforcement Commission and within available appropriations, shall prepare a voter guide for such state election and shall publish such voter guide on the Internet.

(b) The voter guide shall contain:

(1) The date of the state election and the hours the polls will be open;

(2) The name, party affiliation and contact information of each candidate who is nominated or qualifies as a petitioning candidate for election to the office of President of the United States, Vice-President of the United States, senator in Congress, representative in Congress, Governor, Lieutenant Governor, Attorney General, State Treasurer, State Comptroller, Secretary of the State, State Senator or State Representative at the state election. As used in this section, "contact information" means any or all of the following information received by the Secretary of the State in the course of the secretary's elections duties or by the Federal Election Commission: A candidate's campaign mailing address, telephone number, facsimile number, electronic mail address and web site. The voter guide may provide contact information for a candidate for the office of President of the United States, Vice-President of the United States, senator in Congress or representative in Congress by an electronic link to such information on the Federal Election Commission's web site;

(3) The following three maps produced pursuant to the most recent decennial reapportionment of General Assembly and Connecticut congressional districts: One map showing the boundaries of state senatorial districts, one map showing the boundaries of state house of representatives districts and one map showing the boundaries of state congressional districts;
(4) A description of each office to be filled at the state election;

(5) An absentee ballot application in printable format;

(6) Instructions regarding voting by absentee ballot;

(7) Information on the procedure for registering to vote;

(8) A voter registration application in printable format;

(9) The full text of each proposed constitutional amendment that will appear on the ballot at the state election;

(10) The explanatory text as to the content and purpose of each such proposed constitutional amendment, which is prepared by the Office of Legislative Research pursuant to section 2-30a of the general statutes; and

(c) The Secretary of the State, in consultation with the State Elections Enforcement Commission, may adopt regulations, in accordance with the provisions of chapter 54 of the general statutes, to carry out the purposes of this section. Such regulations shall not authorize the inclusion of any information in the voter guide in addition to that required in subsection (b) of this section.

Sec. 6. (Effective from passage) (a) As used in this section, "push poll" means a paid telephone survey, or series of similar telephone surveys, that reference a candidate or group of candidates other than in a basic preference question, and in which:

(1) A list or directory is used, exclusively or in part, to select respondents belonging to a particular subset or combination of subsets of the population, based on demographic or political characteristics such as race, sex, age, ethnicity, party affiliation or similar types of characteristics;
(2) The survey fails to make demographic inquiries on factors such as age, household income or status as a likely voter sufficient to allow for the tabulation of results based on a relevant subset of the population consistent with standard polling industry practices;

(3) The pollster or polling organization does not collect or tabulate the survey results;

(4) The survey prefaces a question regarding support for a candidate on the basis of an untrue statement; and

(5) The survey is primarily for the purpose of suppressing or changing the voting position of the call recipient.

The term "push poll" does not include any survey supporting a particular candidate that fails to reference another candidate or candidates other than in a basic preference question.

(b) The State Elections Enforcement Commission shall conduct a study of the use of push polling in campaigns in the state. Not later than February 1, 2006, said commission shall submit a report on its findings and conclusions, including any recommended legislation, to the joint standing committee of the General Assembly having cognizance of matters relating to elections, in accordance with the provisions of section 11-4a of the general statutes.

Sec. 7. Section 9-242 of the general statutes is repealed and the following is substituted in lieu thereof (Effective from passage):

(a) A voting machine approved by the Secretary of the State shall be so constructed as to provide facilities for voting for the candidates of at least nine different parties or organizations. It shall permit voting in absolute secrecy. It shall be provided with a lock by means of which any illegal movement of the voting or registering mechanism is absolutely prevented. Such machine shall be so constructed that an elector cannot vote for a candidate or on a proposition for whom or on which he is not lawfully entitled to vote.
(b) It shall be so constructed as to prevent an elector from voting for more than one person for the same office, except when he is lawfully entitled to vote for more than one person for that office, and it shall afford him an opportunity to vote for only as many persons for that office as he is by law entitled to vote for, at the same time preventing his voting for the same person twice. It shall be so constructed that all votes cast will be registered or recorded by the machine.

(c) Notwithstanding the provisions of subsection (b) of this section, the Secretary of the State may approve a voting machine which requires the elector in the polls to place his ballot into the recording device and which meets the voluntary performance and test standards for voting systems adopted by (1) the Federal Election Commission on January 25, 1990, as amended from time to time, or (2) the Election Assistance Commission pursuant to the Help America Vote Act of 2002, P.L. 107-252, 42 USC 15481-85, as amended from time to time, whichever standards are most current at the time of the Secretary of the State's approval, and regulations which the Secretary of the State may adopt in accordance with the provisions of chapter 54, provided the voting machine shall [(1)] (A) warn the elector of overvotes, [(2)] (B) not record overvotes, and [(3)] (C) not record more than one vote of an elector for the same person for an office.

(d) Any direct recording electronic voting machine approved by the Secretary of the State for an election or primary held on or after July 1, 2005, shall be so constructed as to:

(1) (A) Contemporaneously produce an individual, permanent, paper record containing all of the elector's selection of ballot preferences for candidates and questions or proposals, if any, prior to the elector's casting a ballot, as set forth in this subsection, and (B) produce at any time after the close of the polls a voting machine self-generated permanent paper record of each such elector's selection of ballot preferences for candidates and questions or proposals, if any. Both the contemporaneous individual paper record and the self-generated paper record of each elector's selection of ballot preferences...
shall include a machine generated unique identifier that can be
matched against each other and which preserves the secrecy of such
elector's ballot as set forth in subdivision (6) of this subsection;

(2) Provide each elector with an opportunity to verify that the
contemporaneously produced paper record accurately conforms to
such elector's selection of ballot preferences, as reflected on the screen
display or electronic summary, and to hear, if desired, an audio
description of such ballot display or screen summary, for the purpose
of having an opportunity to make any corrections or changes prior to
casting the ballot. In the event that the elector makes corrections or
changes prior to casting the ballot, the first paper record shall be
voided and another paper record shall be contemporaneously
produced and the elector shall be provided with another opportunity
to verify ballot preferences as described in this subsection;

(3) Be accessible to blind or visually impaired persons if it provides
electors with an audio description of the machine's electronic screen
display or electronic summary screen at the time that the elector
completes the selection of ballot preferences and casts the ballot as
provided in this subsection;

(4) Meet such additional standards of accessibility, consistent with
this subsection, included in regulations that the Secretary of the State
may adopt, in accordance with the provisions of chapter 54, and meet
the standards of accessibility enunciated by the Election Assistance
Commission pursuant to its implementation of the Help America Vote
Act of 2002, P.L. 107-252, 42 USC 15481-85, as amended from time to
time;

(5) Provide that a ballot shall be deemed cast on the direct recording
electronic voting machine at the time that an elector's
contemporaneously produced individual, permanent, paper record,
containing all of the elector's final selection of ballot preferences, is (A)
deposited inside a receptacle designed to store all of the individual,
permanent, voter-verified paper records produced by such voting
machine on the day of the election or primary, and (B) the elector's selection of ballot preferences is simultaneously electronically recorded inside the voting machine for the purpose of (i) being electronically tabulated immediately after the polls are closed, and (ii) producing, on such other day as required under this subsection, a voting machine self-generated, individual, permanent paper record of each such elector's selection of ballot preferences for candidates and questions or proposals, if any; and

(6) Except as otherwise provided in subdivision (1) of section 8 of this act, secure the secrecy of each such elector's ballot by making it impossible for any other individual to identify the elector in relationship to such elector's selection of ballot preferences (A) at the time that the elector is selecting ballot preferences; (B) at the time that the elector is verifying the accuracy of the screen display or electronic summary by comparing it to the paper record or audio description of the ballot display or screen summary, as the case may be, prior to casting a ballot; (C) while making corrections or changes by reselecting ballot preferences and verifying the accuracy thereof in the same manner as set forth in subdivision (2) of this subsection prior to casting a ballot; (D) at the time that the elector casts the ballot; or (E) at the time that all electors' ballots are canvassed, recanvassed or otherwise tallied to produce a final count of the vote for candidates or propositions, whether through the electronic vote tabulation process or through the manual count process of each elector's individual, permanent, voter-verified paper record, as set forth in section 8 of this act.

Sec. 8. (NEW) (Effective from passage) The following procedures shall apply to any election or primary in which one or more direct recording electronic voting machines are used:

(1) Any elector who requires assistance by reason of blindness, disability, or inability to read or write shall have the right to request assistance inside the voting booth by a person of the elector's choice in accordance with 42 USC 1973aa-6, as amended from time to time or
section 9-264 of the general statutes.

(2) A canvass of the votes shall take place inside the polling place immediately following the close of the polls on the day of the election or primary in accordance with the requirements of chapter 148 of the general statutes. With respect to direct recording electronic voting machines, any such canvass shall be an electronic vote tabulation of all of the votes cast on each such voting machine for each candidate and question or proposal. The moderator shall then add together all of the votes recorded on each voting machine in use at the polling place, whether or not such voting machines were direct recording electronic or not, to produce a cumulative count within the polling place of all candidates and any questions or proposals appearing on the ballot in the election or primary. Any member of the public shall have a right to be present in the polling place to observe the canvass of the votes beginning as soon as the polls are declared closed by the moderator and continuing throughout the canvass of the votes of each voting machine until the final canvass of all of the votes cast on all of the voting machines in use in the polling place are added together for each candidate and question or proposal and publicly announced and declared by the moderator.

(3) If a recanvass of the votes is required pursuant to chapter 148 of the general statutes, the recanvass officials shall, in addition to the other requirements of said chapter, conduct a manual tally of the individual, permanent, voter-verified paper records contemporaneously produced by each direct recording electronic voting machine used within the geographical jurisdiction that is subject to such recanvass. The manual tally conducted for the recanvass shall be limited to the particular candidates and questions or proposals that are subject to recanvass. If the manual tabulation of the individual, permanent, voter-verified paper records does not reconcile with the electronic vote tabulation of a particular direct recording electronic voting machine or machines, the individual permanent voter-verified paper records shall be considered the true and correct record of each elector's vote on such voting machine or machines and
shall be used as the official record for purposes of declaring the official
election results or for purposes of any subsequent recanvass, tally or
election contest conducted pursuant to chapters 148 to 153, inclusive,
of the general statutes. If any of the contemporaneously produced
individual, permanent, voter-verified paper records are found to have
been damaged in such manner as they are unable to be manually
tallied with respect to the ballot positions that are the subject of the
recanvass, each such damaged record shall be matched against the
self-generated, individual, permanent paper record produced by the
voting machine bearing the identical machine-generated unique
identifier as the damaged record and, in such instance, shall be
substituted as the official record for purposes of determining the final
election results or for purposes of any subsequent recanvass, tally or
election contest. Notwithstanding the provisions of chapter 148 of the
general statutes, the Secretary of the State may order a discrepancy
recanvass for a state or district office, including a federal office, if the
Secretary has reason to believe that discrepancies may have occurred
that could affect the outcome of the election.

(4) Not later than five business days after each election in which a
direct recording electronic voting machine is used, the registrars of
voters or their designees, representing at least two political parties,
shall conduct a manual audit of the votes recorded on at least one
direct recording electronic voting machine used in each voting district.
Not later than five business days after a primary in which a direct
recording electronic voting machine is used, the registrar of voters of
the party holding the primary shall conduct such a manual audit by
designating two or more individuals, one of whom may be the
registrar, representing at least two candidates in the primary. The
machine or machines audited under this subdivision shall be selected
in a random drawing that is announced in advance to the public and is
open to the public. All direct recording electronic voting machines
used within a voting district shall have an equal chance of being
selected for the audit. The method of conducting the random drawing
may begin with a random number seed, use the last three digits of a
state lottery drawing determined in advance, use a random number
table recognized by statisticians as authoritative, or use any
combination of such methods or similar methods as may be
determined by the Secretary of the State in advance and publicly
announced. The manual audit shall consist of a manual tally of the
individual, permanent, voter-verified paper records produced by each
voting machine subject to the audit and a comparison of such count,
with respect to all candidates and any questions or proposals
appearing on the ballot, with the electronic vote tabulation reported
for such voting machine on the day of the election or primary. Such
audit shall not be required if a recanvass has been, or will be,
conducted on the voting machine. Such manual audit shall be noticed
in advance and be open to public observation. A reconciliation sheet,
on a form prescribed by the Secretary of the State, that reports and
compares the manual and electronic vote tabulations of each candidate
and question or proposal on each such voting machine, along with any
discrepancies, shall be prepared by the audit officials, signed and
forthwith filed with the town clerk of the municipality and the
Secretary of the State. If any contemporaneously produced individual,
permanent, voter-verified paper record is found to have been
damaged, the same procedures described in subdivision (3) of this
section for substituting such record with the self-generated, individual,
permanent paper record produced by the voting machine bearing the
identical machine-generated unique identifier as the damaged record
shall apply and be utilized by the audit officials to complete the
reconciliation. The reconciliation sheet shall be open to public
inspection and may be used as prima facie evidence of a discrepancy in
any contest arising pursuant to chapter 149 of the general statutes. If
the audit officials are unable to reconcile the manual count with the
electronic vote tabulation and discrepancies, the Secretary of the State
shall conduct such further investigation of the voting machine
malfunction as may be necessary for the purpose of reviewing whether
or not to decertify the voting machine or machines and may order a
recanvass in accordance with the provisions of subdivision (3) of this
section.
(5) The individual, permanent, voter-verified paper records produced by any direct recording electronic voting machine in use at an election or primary held on or after the effective date of this section shall be carefully preserved and returned in their designated receptacle in accordance with the requirements of section 9-266, 9-302 or 9-310 of the general statutes, whichever is applicable, and may not be opened or destroyed, except during recanvass or manual audit as set forth in this section, for one hundred eighty days following an election or primary that does not include a federal office, pursuant to section 9-310 of the general statutes, or for twenty-two months following an election or primary involving a federal office, pursuant to 42 USC 1974, as amended from time to time.

(6) Nothing in this section shall preclude any candidate or elector from seeking additional remedies pursuant to chapter 149 of the general statutes.

(7) After an election or primary, any voting machine may be kept locked for a period longer than that prescribed by sections 9-266, 9-310 and 9-447 of the general statutes, if such an extended period is ordered by either a court of competent jurisdiction or the State Elections Enforcement Commission. Either the court or said commission may order an audit of such voting machines to be conducted by such persons as the court or said commission may designate.
