

Testimony opposed to H.B. 7395 "An Act Concerning Marriage Equality"

Dear Legislators; Please consider opposing the above bill. If you are currently in favor, please consider modifying your views according to the natural flow and order of the created world, as opposed to persons who have radical special interest agendas. Created beings in balance and harmony with nature provide naturally for their progeny and one another, according to each species. Humanity has two genders, male and female. Our current marriage laws protect this natural order and accommodate the needs of persons living in society as a whole. Problems existing in or flowing out of the human institution of marriage do not flow out of the current marriage law being discriminatory, but rather out of our disordered, selfish or sinful human natures. The marriage law as it is currently defined is not discriminatory. Rather it invokes the natural law and order found in the created world. This is a great good. The rate of growth of our human population is not on the increase; rather it is on the decline. This is a sign that all in not well. To change the current law will hurt us further as a human population and is not the will of the majority of our state population. In times past it is a known fact that populations growing in numbers of persons with disordered orientations such as lesbianism and homosexuality died out and or were destroyed both naturally and supernaturally. We need to listen to and learn from history. Civil unions are already legislated and tolerated in our state. Legislation redefining marriage as two persons of one gender must be opposed because only male and female genders in the natural created order can be progenitors. Consummations of marriage need two genders, male and female. Please listen to the natural order and protect marriage.
