IN SUPPORT OF SB 190

To the General Assembly:

As the Executive Director and representative of the Connecticut Eye Bank and Visual Research Foundation, we wish to acknowledge the full support for BILL # SB190. As we are a non-profit organization that promotes and facilitates the referral, donation, recovery of donated cornea tissues from individuals in Connecticut along with the placement for transplantation to those patients awaiting sight restorative surgeries in Connecticut, I wish to again state we fully support this bill. As we work with and closely collaborate with our two designated organ recovery organizations, LifeChoice Donor Services and New England Organ Bank where they promote and facilitate the referral, donation, recovery and organ placement process for life sustaining transplantation to patients in Connecticut, I again wish to state our support for this bill. Please share this with the appropriate individuals as our testimony of support for BILL # SB190.

Sincerely,

Allen J. Brown
Executive Director
