

THE ENERGY AND TECHNOLOGY COMMITTEE

HOUSE BILL No. 5326: AAC MUNICIPAL ELECTRIC COSTS

FEBRUARY 26, 2008

The Department of Public Utility Control supports Raised Bill 5326. Specifically, this proposal adds language to C.G.S. section 16-244c to include school districts and municipalities as part of the customer class which electric distribution companies are required to serve through standard service.

In the Department's view, the transfer of these entities to standard service will achieve the desired goal of more stable and lower prices than these entities are currently experiencing.
