Raised Bills No.603 and 607

I am most definitely opposed to both of these bills.

I want to thank you for having the lottery system for the speakers and I also want to thank the Committee for allowing me to speak.

It seems as though every year a bill or bills are proposed to make it more and more difficult for honest law abiding citizens to obtain and possess fire arms. These bills may be proposed to make for a safer society, but I believe that they are just small moves to try to take away our guns. Please remember that about 80 years ago, one of the safest places to be was Nazi ( Nationalist Socialist Party) Germany. It was safe, of course, if you were not a Jew, Gypsy, Trade Union Leader, Communist, Socialist, or one who spoke out against the government or had someone say that you spoke out against the government. I suggest that you read the book, Gun Control, Gateway to Tyranny, The Nazi Weapons Law, 18 March 1938. The book has the original German text and translation, with an analysis that U.S. "Gun Control" laws have Nazi roots.

Crime will never be reduced until we legalize drugs but that will probably never happen, I believe, because the vast amount of profit from the sale of drugs can buy an awful lot of political influence.

So that we don't have to fight a battle every year, I suggest that we eliminate all the existing Connecticut gun laws and replace them with one of the following.

- 1) Have a law identical to that of the State of Vermont which has only one gun law.

Vermonts gun law states, "You can use a gun for anything except illegal purposes"

Or

2) Only loyal Party Officials and their friends, Police and Military will be allowed to possess fire arms.

Attached page 3 shows how easy it is to change a firing pin in some semi-automatic pistols
