

**Testimony of Connecticut Fund for the Environment
Before the Environment Committee**

*In Support of S.B. No. 569, AN ACT CONCERNING ENHANCEMENTS TO INLAND
WETLANDS AND WATERCOURSES ACT*

Submitted by Curt Johnson, Senior Staff Attorney
February 23, 2009

*Connecticut Fund for the Environment ("CFE"), with a total membership of
approximately 6,000 Connecticut members, uses law and science to defend Connecticut's
air, land and water.*

The Connecticut Fund for the Environment (CFE) strongly supports the concept bill S.B. 569, An Act Concerning Enhancements to Inland Wetlands and Watercourses Act. CFE's testimony today specifically addresses the attached substitute bill language which makes certain amendments to the Connecticut General Statutes § 22a-36 *et seq.* known as the Inland Wetlands and Watercourses Act.

**We Must Clarify the law so local Wetlands Agencies can better protect Inland
Wetlands and Watercourses**

Recent court decisions have placed an increased legal burden on local volunteer inland wetlands agencies who work every night to protect wetlands, watercourses and associated resources. Our Connecticut Supreme Court has stated that the purpose of the Act is not to protect these resources, but to regulate them. The Court has also held that in order to deny a permit, wetlands agencies must not only have before them evidence that the activity is potentially harmful, but that the activity will almost certainly result in actual harm to the resource – a very difficult burden to prove. Moreover, courts have been suggesting that local wetland agencies can only rely on expert witnesses in reaching their determinations. This dangerous drift is beginning to hold agencies hostage to paid experts hired by developers, and is raising questions about their ability to rely on important free sources of relevant information, such as environmental review team

reports, letters from local water companies or state agencies or the direct observations of local citizens who have often spent hours observing actual conditions on the property.

S.B. 569 Empowers local Wetlands Agencies to protect Wetlands and Watercourses

S.B. 569 contains a few simple, but important clarifications.

First, sections 1 and 2(a) clarifies that the purpose of the Inland Wetlands Act is to protect wetlands and watercourses.

Second, section 3(c)(1) clarifies that the burden of proof falls on a developer to demonstrate that their development project will be protective of wetlands and watercourses. Section 3(d)(1) also clarifies that wetlands agencies can rely on a wide array of relevant evidence brought before them, including, state agency letters and comments, water company comments, environmental reviews, and direct observations of ordinary people, as well as expert opinions.

The CFE urges the Committee to vote favorably on S.B. 569. This proposed law will create the kind of environmental outcomes we all desire – better, common sense protections of our wetlands, streams, rivers and ponds in our state.

AN ACT CONCERNING ENHANCEMENTS TO THE INLAND WETLANDS AND WATERCOURSES ACT.

Be it enacted by the Senate and House of Representatives in General Assembly convened:

Section 1. Section 22a-36 of the general statutes is repealed and the following is substituted in lieu thereof (*Effective October 1, 2009*):

The inland wetlands and watercourses of the state of Connecticut are an indispensable and irreplaceable but fragile natural resource with which the citizens of the state have been endowed. The wetlands and watercourses are an interrelated web of nature essential to an adequate supply of surface and underground water; to hydrological stability and control of flooding and erosion; to the recharging and purification of groundwater; and to the existence of many forms of animal, aquatic and plant life. Many inland wetlands and watercourses have been destroyed or are in danger of destruction because of unregulated use by reason of the deposition, filling or removal of material, the diversion or obstruction of water flow, the erection of structures and other uses, all of which have despoiled, polluted and eliminated wetlands and watercourses. Such unregulated activity has had, and will continue to have, a significant, adverse impact on the environment and ecology of the state of Connecticut and has and will continue to imperil the quality of the environment thus adversely affecting the ecological, scenic, historic and recreational values and benefits of the state for its citizens now and forever more. The preservation and protection of the wetlands and watercourses from random, unnecessary, undesirable and unregulated uses, disturbance or destruction is in the public interest and is essential to the health, welfare and safety of the citizens of the state. It is [, therefore,] the purpose of sections 22a-36 to 22a-45, inclusive, as amended by this act, to protect the citizens of the state by making provisions for the protection, preservation, maintenance and use of the inland wetlands and watercourses by minimizing their disturbance and pollution; maintaining and improving water quality in accordance with the highest standards set by federal, state or local authority; preventing damage from erosion, turbidity or siltation; preventing loss of fish and other beneficial aquatic organisms, wildlife and vegetation and the destruction of the natural habitats thereof; deterring and inhibiting the danger of flood and pollution; protecting the quality of wetlands and watercourses for their conservation, economic, aesthetic, recreational and other public and private uses and values; and protecting the state's potable fresh water supplies from the dangers of drought, overdraft, pollution, misuse and

mismanagement by providing an orderly process to balance the need for the economic growth of the state and the use of its land with the need to protect its environment and ecology in order to forever guarantee to the people of the state, the safety of such natural resources for their benefit and enjoyment and for the benefit and enjoyment of generations yet unborn. It is, therefore, hereby declared to be the public policy of the state to preserve the inland wetlands and watercourses of the state and to prevent the despoliation and destruction of such inland wetlands and watercourses.

Sec. 2. Section 22a-42 of the general statutes is repealed and the following is substituted in lieu thereof (*Effective October 1, 2009*):

(a) To carry out and effectuate the purposes and policies of sections 22a-36 to 22a-45a, inclusive, as amended by this act, it is hereby declared to be the public policy of the state to require municipal regulation of activities affecting the wetlands and watercourses within the territorial limits of the various municipalities or districts, to preserve such wetlands and watercourses and to prevent the despoliation and destruction of such wetlands and watercourses.

(b) Any municipality may acquire wetlands and watercourses within its territorial limits by gift or purchase, in fee or lesser interest including, but not limited to, lease, easement or covenant, subject to such reservations and exceptions as it deems advisable.

(c) On or before July 1, 1988, each municipality shall establish an inland wetlands agency or authorize an existing board or commission to carry out the provisions of sections 22a-36 to 22a-45, inclusive, as amended by this act. Each municipality, acting through its legislative body, may authorize any board or commission, as may be by law authorized to act, or may establish a new board or commission to promulgate such regulations, in conformity with the regulations adopted by the commissioner pursuant to section 22a-39, as are necessary to protect the wetlands and watercourses within its territorial limits. The ordinance establishing the new board or commission shall determine the number of members and alternate members, the length of their terms, the method of selection and removal and the manner for filling vacancies in the new board or commission. No member or alternate member of such board or commission shall participate in the hearing or decision of such board or commission of which he is a member upon any matter in which he is directly or indirectly interested in a personal or financial sense. In the event of such disqualification, such fact shall be entered on the records of

such board or commission and replacement shall be made from alternate members of an alternate to act as a member of such commission in the hearing and determination of the particular matter or matters in which the disqualification arose. For the purposes of this section, the board or commission authorized by the municipality or district, as the case may be, shall serve as the sole agent for the licensing of regulated activities.

(d) At least one member of the inland wetlands agency or staff of the agency shall be a person who has completed the comprehensive training program developed by the commissioner pursuant to section 22a-39. Failure to have a member of the agency or staff with training shall not affect the validity of any action of the agency. The commissioner shall annually make such program available to one person from each town without cost to that person or the town. Each inland wetlands agency shall hold a meeting at least once annually at which information is presented to the members of the agency which summarizes the provisions of the training program. The commissioner shall develop such information in consultation with interested persons affected by the regulation of inland wetlands and shall provide for distribution of video presentations and related written materials which convey such information to inland wetlands agencies. In addition to such materials, the commissioner, in consultation with such persons, shall prepare materials which provide guidance to municipalities in carrying out the provisions of subsection (f) of section 22a-42a, as amended by this act.

(e) Any municipality, pursuant to ordinance, may act through the board or commission authorized in subsection (c) of this section to join with any other municipalities in the formation of a district for the regulation of activities affecting the wetlands and watercourses within such district. Any city or borough may delegate its authority to regulate inland wetlands under this section to the town in which it is located.

(f) Municipal or district ordinances or regulations may embody any regulations promulgated hereunder, in whole or in part, or may consist of other ordinances or regulations in conformity with regulations promulgated hereunder. Any ordinances or regulations shall be for the purpose of effectuating the purposes of sections 22a-36 to 22a-45, inclusive, as amended by this act, and, a municipality or district, in acting upon ordinances and regulations shall incorporate the factors set forth in section 22a-41.

(g) Nothing contained in this section shall be construed to limit the existing authority of a municipality or any boards or commissions of the

municipality, provided the commissioner shall retain authority to act on any application filed with said commissioner prior to the establishment or designation of an inland wetlands agency by a municipality.

Sec. 3. Section 22a-42a of the general statutes is repealed and the following is substituted in lieu thereof (*Effective October 1, 2009*):

(a) The inland wetlands agencies authorized in section 22a-42, as amended by this act, shall through regulation provide for (1) the manner in which the boundaries of inland wetland and watercourse areas in their respective municipalities shall be established and amended or changed, (2) the form for an application to conduct regulated activities, (3) notice and publication requirements, (4) criteria and procedures for the review of applications and (5) administration and enforcement.

(b) No regulations of an inland wetlands agency including boundaries of inland wetland and watercourse areas shall become effective or be established until after a public hearing in relation thereto is held by the inland wetlands agency. Any such hearing shall be held in accordance with the provisions of section 8-7d. A copy of such proposed regulation or boundary shall be filed in the office of the town, city or borough clerk as the case may be, in such municipality, for public inspection at least ten days before such hearing, and may be published in full in such paper. A copy of the notice and the proposed regulations or amendments thereto, except determinations of boundaries, shall be provided to the commissioner at least thirty-five days before such hearing. Such regulations and inland wetland and watercourse boundaries may be from time to time amended, changed or repealed, by majority vote of the inland wetlands agency, after a public hearing in relation thereto is held by the inland wetlands agency, in accordance with the provisions of section 8-7d. Regulations or boundaries or changes therein shall become effective at such time as is fixed by the inland wetlands agency, provided a copy of such regulation, boundary or change shall be filed in the office of the town, city or borough clerk, as the case may be. Whenever an inland wetlands agency makes a change in regulations or boundaries it shall state upon its records the reason why the change was made and shall provide a copy of such regulation, boundary or change to the Commissioner of Environmental Protection no later than ten days after its adoption provided failure to submit such regulation, boundary or change shall not impair the validity of such regulation, boundary or change. All petitions submitted in writing and in a form prescribed by the inland wetlands agency, requesting a change in the regulations or the boundaries of an inland wetland and watercourse area shall be considered at a public

hearing held in accordance with the provisions of section 8-7d. The failure of the inland wetlands agency to act within any time period specified in this subsection, or any extension thereof, shall not be deemed to constitute approval of the petition.

(c) (1) On and after the effective date of the municipal regulations promulgated pursuant to subsection (b) of this section, no regulated activity shall be conducted upon any inland wetland or watercourse without a permit. Any person proposing to conduct or cause to be conducted a regulated activity upon an inland wetland or watercourse shall file an application with the inland wetlands agency of the town or towns wherein the wetland or watercourse in question is located and such person shall bear the burden of proving that such person is entitled to such permit. The application shall be in such form and contain such information as the inland wetlands agency may prescribe. The date of receipt of an application shall be determined in accordance with the provisions of subsection (c) of section 8-7d. The inland wetlands agency shall not hold a public hearing on such application unless the inland wetlands agency determines that the proposed activity may have a significant impact on wetlands or watercourses, a petition signed by at least twenty-five persons who are eighteen years of age or older and who reside in the municipality in which the regulated activity is proposed, requesting a hearing is filed with the agency not later than fourteen days after the date of receipt of such application, or the agency finds that a public hearing regarding such application would be in the public interest. An inland wetlands agency may issue a permit without a public hearing provided no petition provided for in this subsection is filed with the agency on or before the fourteenth day after the date of receipt of the application. Such hearing shall be held in accordance with the provisions of section 8-7d and shall consider all relevant evidence brought before such agency or agent by any person or entity, including, but not limited to, scientific evidence, expert opinion, direct observations made regarding the proposed regulated activity, environmental reviews, policy letters or guidance documents provided by or on behalf of an environmental review team or the Department of Environmental Protection, and written comments or oral testimony submitted by the Commissioner of Public Health or by or on behalf of a water company in response to written notice provided such water company pursuant to section 22a-42f. If the inland wetlands agency, or its agent, fails to act on any application within thirty-five days after the completion of a public hearing or in the absence of a public hearing within sixty-five days from the date of receipt of the application, or within any extension of any such period as provided in section 8-7d, the applicant may file such application with the

Commissioner of Environmental Protection who shall review and act on such application in accordance with this section. Any costs incurred by the commissioner in reviewing such application for such inland wetlands agency shall be paid by the municipality that established or authorized the agency. Any fees that would have been paid to such municipality if such application had not been filed with the commissioner shall be paid to the state. The failure of the inland wetlands agency or the commissioner to act within any time period specified in this subsection, or any extension thereof, shall not be deemed to constitute approval of the application.

(2) An inland wetlands agency may delegate to its duly authorized agent the authority to approve or extend an activity that is not located in a wetland or watercourse when such agent finds that the conduct of such activity would result in no greater than a minimal impact on any wetland or watercourse provided such agent has completed the comprehensive training program developed by the commissioner pursuant to section 22a-39. Notwithstanding the provisions for receipt and processing applications prescribed in subdivision (1) of this subsection, such agent may approve or extend such an activity at any time. Any person receiving such approval from such agent shall, within ten days of the date of such approval, publish, at the applicant's expense, notice of the approval in a newspaper having a general circulation in the town wherein the activity is located or will have an effect. Any person may appeal such decision of such agent to the inland wetlands agency within fifteen days after the publication date of the notice and the inland wetlands agency shall consider such appeal at its next regularly scheduled meeting provided such meeting is no earlier than three business days after receipt by such agency or its agent of such appeal. The inland wetlands agency shall, at its discretion, sustain, alter or reject the decision of its agent or require an application for a permit in accordance with subdivision (1) of subsection (c) of this section, as amended by this act.

(d) (1) In granting, denying or limiting any permit for a regulated activity the inland wetlands agency, or its agent, shall consider the factors set forth in section 22a-41, and such agency, or its agent, shall state upon the record the reason for its decision. In granting a permit the inland wetlands agency, or its agent, may grant the application as filed or grant it upon other terms, conditions, limitations or modifications of the regulated activity which are designed to carry out the policy of sections 22a-36 to 22a-45, inclusive, as amended by this act. Such terms may include any reasonable measures which would mitigate the impacts of the regulated activity and which would (A) prevent or minimize pollution or other environmental damage, (B) maintain or enhance existing environmental

quality, or (C) in the following order of priority: Restore, enhance and create productive wetland or watercourse resources. No person shall conduct any regulated activity within an inland wetland or watercourse which requires zoning or subdivision approval without first having obtained a valid certificate of zoning or subdivision approval, special permit, special exception or variance or other documentation establishing that the proposal complies with the zoning or subdivision requirements adopted by the municipality pursuant to chapters 124 to 126, inclusive, or any special act. The agency may suspend or revoke a permit if it finds after giving notice to the permittee of the facts or conduct which warrant the intended action and after a hearing at which the permittee is given an opportunity to show compliance with the requirements for retention of the permit, that the applicant has not complied with the conditions or limitations set forth in the permit or has exceeded the scope of the work as set forth in the application. The applicant shall be notified of the agency's decision by certified mail within fifteen days of the date of the decision and the agency shall cause notice of their order in issuance, denial, revocation or suspension of a permit to be published in a newspaper having a general circulation in the town wherein the wetland or watercourse lies. In any case in which such notice is not published within such fifteen-day period, the applicant may provide for the publication of such notice within ten days thereafter.

(2) Any permit issued under this section for the development of property for which an approval is required under section 8-3, 8-25 or 8-26 shall be valid for five years provided the agency may establish a specific time period within which any regulated activity shall be conducted. Any permit issued under this section for any other activity shall be valid for not less than two years and not more than five years. Any such permit shall be renewed upon request of the permit holder unless the agency finds that there has been a substantial change in circumstances which requires a new permit application or an enforcement action has been undertaken with regard to the regulated activity for which the permit was issued provided no permit may be valid for more than ten years.

(e) The inland wetlands agency may require a filing fee to be deposited with the agency. The amount of such fee shall be sufficient to cover the reasonable cost of reviewing and acting on applications and petitions, including, but not limited to, the costs of certified mailings, publications of notices and decisions and monitoring compliance with permit conditions or agency orders.

(f) If a municipal inland wetlands agency regulates activities within areas around wetlands or watercourses, such regulation shall (1) be in accordance with the provisions of the inland wetlands regulations adopted by such agency related to application for, and approval of, activities to be conducted in wetlands or watercourses and (2) apply only to those activities which are likely to impact or affect wetlands or watercourses.
