Testimony in support of SB994

March 7, 2009

I am asking you to pass this piece of legislation as I feel these traps are cruel in the first place & used by those not "authorized" causing unnecessary suffering to unintended victims. Labeling them with a trapper's information does NOT have any effect on the fact that these traps are not selective as evidenced by the recent case of the owl trapped in one. Please ban these traps and end the pain and suffering that results from their use.

Sincerely,

Kimberly McClure Brinton DVM
