

Proposal hb5946

I am in support of this bill for the following reasons

These people who are advertising removal of junk cars are largely independent and unlicensed who are ill-equipped to dispose of all the hazardous materials who are regulated and inspected by the D.E.P and E.P.A. Some of these materials are fluids tires cat converters mercury switches just to name a few. Ill handling of these materials because of not being properly recycled become a burden to the tax payers that's why you see car parts on the side of the road. They have no proper way to dispose of them. These people are able to deceive the public

Seventh there are licenses still available the chose to run legal junk yards. They don't file titles with the state. They are also UN able to provide tax receipt to the owners of the vehicles. In many cases they don't require a title. In my area alone north east corner we have three licensed yards but we have 20 different people advertising and removing vehicles with no license

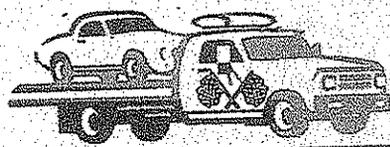

This is a regulated industry by department of motor vehicles D.E.P and E.P.A and our facilities are inspected by these departments to make sure items are recycled properly.

Attached are a few examples of some of these people
