

ADHP Petition

We the undersigned urge your support of a much needed advanced practitioner. The Advanced Dental Hygiene Practitioner (Bill #5630) is being brought before the CT State Legislature. This provider would be to dentistry what the nurse practitioner is to the medical field. The advanced Master's degree program would allow licensed practitioners to meet the needs of people who are the most needy and unable to get access to dental care.

As a professional caring for patients in need, I am in favor of this legislation. I urge the Public Health Committee members to Please vote "YES," in support of HB 5630. Allow educated professionals to provide care for those seeking dental care, not currently available to them.
