Hello, I am writing this testimony to let u know that Lymes Disease is a very serious and prevalent. I have had the disease for a few years now and have not been the same since I was diagnosed. I used to be able to lift heavy weights at the gym, now I have to use lighter ones and can not sustain high impact aerobics. My ears have a constant ringing in them which is extremely annoying when trying to sleep. I am always tired and at times feel like a truck has run me over. Lymes disease has taken my immune system for a roller coaster ride. My immune system went from a 9 to a 5 in a matter of months. Please hear me and thousands of others, we need help funding this disease. Health insurance need to help us. Don't know if anyone close to you has been bitten by this little monster bug, but if not call yourself lucky. Imagine how you would fight for health care for this disease if your loved one was fighting for their lives. Thank you for your time
