

TOTAL LYME CASES REPORTED BY CDC 1990-2007

[Click states to view history](#)

U.S. TOTAL CASES 1990-2007: 292,930

Note: CDC says Lyme disease is under-reported and that only about 10% of cases that meet CDC surveillance criteria are actually reported to CDC. (For example, Oklahoma 363 reported cases = 3,630 probable cases meeting CDC criteria.)
