Honorable Members of the Transportation Committee
Connecticut General Assembly
Room 2300, Legislative Office Building
Hartford, CT 06106

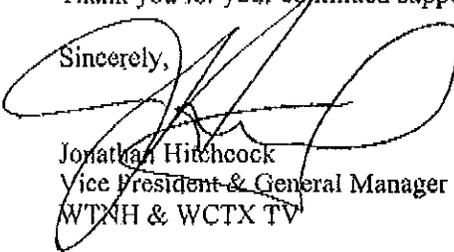

Dear Legislators:

I am writing to your offices to ask your economic support in the future of Tweed New Haven Airport. Tweed is a mode of transportation for business and personal travelers in our immediate region. A local airport would stimulate economic activity in the city and surrounding towns.

We require a reliable transportation system that includes convenient air service, free of long commutes and traffic congestion. Our local businesses are known for transporting their guests and visitors on a regular basis. Not to mention these travelers also bring a source of revenue. Tweed would also relieve existing traffic along the New Haven to New York corridor by providing a viable alternative to other major airports. Tweed airport also conveys a message that our area is creating employment opportunities during a struggling economy.

Thank you for your continued support.

Sincerely,

Jonathan Hitchcock
Vice President & General Manager
