

Testimony Regarding African-American Affairs Commission

10 years years ago the State Gov seriously looked into issues affecting African American Community such as Economic Development, Education and health.

The AAAC start fighting pollution and lead poisoning in the African American neighborhoods.

The AAAC empowered African Americans to participate, in the decision making process such as:

- (a) Combating Hate Crimes
- (b) Access to higher Education
- (c) The AAAC is well recognized in variety of initiatives including Education and Economic Development .

The AAAC will increase the African American communities to actively engage in any state or federal economic development.

I would also agree the commissions mission statement that will Provide resources and also a voice for the African American Community..

We have to keep and maintain the AAAC and not to eliminate.

Thank you

Mohamoud D Ahmed (President Africa Trade and information center)
