

# "CANS FOR KIDS"

February 1, 2009

Environmental Committee;

Dear Committee Members;

"Cans for Kids is still collecting five cent deposits, soda and beer. "Cans for Kids" is still donating money to the Connecticut Children's Medical Center, almost five hundred thousand dollars to date.

"Cans for Kids" is also donating money to the Enfield Food Shelf, helping to feed hungry kids.

My point is, bottle and can redemption is working. Big money can be made to do alot of good for alot of people.

We are only one little non-profit organization and as you can see, we have managed to make a big impact .

Beside the fact that alot of money is donated, alot of rubbish is taken off the roads and out of parking lots and other public places. If you give some one the incentive to pick up a bottle or can, usually they will do it. No one wants to save water bottles now because they are of no value. Put a deposit on them and watch what happens.

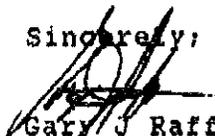

In these difficult times it nice to see that many many people and businesses still support "Cans for Kids. It is nice to see that a scout troop can earn some money to take a camping trip.

It is nice to see that a homeless person can enjoy a meal at McDonalds.

My point is, put a deposit on it and you are helping some one at the ground level. Please consider deposit on non-carbonated beverages.

Thanks for listening

Sincerely;

Gary J Raffia  
Director "Cans for Kids"
