

# "Do You Suffer from these Seven Symptoms of this Often Misdiagnosed Problem?..."

*Tens of millions suffer, and often don't know where to turn...*

Dear Friend,

The problem is often misdiagnosed, or not diagnosed at all. But, it affects the lives of between 10 and 20 million Americans.

The problem can cause:

1. Numbness.
2. Burning pain.
3. Cramping.
4. Sharp, electric pain.
5. Hurt when you walk.
6. Difficulty sleeping from leg/foot discomfort.
7. Prickling/tingling feelings.

If you suffer from one or more of these problems, you may have peripheral neuropathy. And, if you do, you're not alone.

Often, these good people have been frustrated by the traditional care they've received for these terrible problems, and are still seeking help. These problems can be caused by diabetes, hereditary disorders, inflammations, medications such as cholesterol lowering (statin) drugs, and more.

For the past **2 years**, I've studied this class of conditions, collectively known as "peripheral neuropathies." In fact, helping people with these problems has become a primary focus of mine.

It's not unusual for me to hear stories from patients who've suffered for years with terrible symptoms. For many, they are missing out on the things they love to do. They aren't enjoying life as they once did.

If that describes you, then perhaps I can help. I practice a multi-prolonged attack to these problems. It's a unique program that has already helped hundreds nationwide.

That's why I've put together the "Peripheral Neuropathy Treatment Pain Program" for anyone suffering from the symptoms of peripheral neuropathy pain. And, the beautiful thing is that when these health situations are resolved, people have great improvement in the quality of their lives. In many cases, they finally can live pain free, with peace and joy in their lives again.

I'm a proud member of the Neuropathy Treatment Center of America. This gives me a unique set

of knowledge and tools that have been tested, researched, and found to be effective:

Here's what some people had to say:

*"It was so hard keeping my leg calm and still at night and try to stop kicking my husband. It made me so mad! My feet and leg were so cold that I couldn't sleep. For the past week I have not had the restless leg syndrome, and my feet are warm at night and I have been able to finally rest!"*

*"When I started a couple months ago, my feet burned, they burned all the time. It was no way to live a life. They even hurt and burned through the night, so my life was really like living in HELL! After my care, I have very little of that burning sensation and things are a whole lot better for me!"*

## Innovative care - Powerful results

Using the latest technology, I offer non-invasive care. I help patients get well with literally no twisting or popping of their spine because I use patented adjusting instrumentation that is highly researched, low-force and computerized. This frees the nerves, and the damage caused by old herniated discs or arthritis. We also use Low Level Light Therapy (LLLT). It's a newly developed tool that's very safe. This non-invasive healing light uses pulsed infrared light that has been proven to work wonders on peripheral neuropathy symptoms.

## About Me

My goal is to get the word out to as many people as we can that our office may be the place for you!

## Do You Qualify For This New Program?

When you call and make an appointment, I'll perform a highly specialized Qualitative Clinical Scoring System of the Peripheral Nervous System to see if we may be able to help. But, please call right away because we can only take the first **27** callers. If you are one of these **27**, I'll do this Evaluation and Qualifying Process Completely **FREE!!!** So, please call my Appointment Coordinator at: **203-656-3636**. I don't want you to miss out on this golden opportunity! Due to the nature of this offer, it will end on **December 4th, 2009**. Add some peace to your life or the life of someone you love. Call me today to make an appointment. We can help you. Thank you,

**Dr. Brian McKay**

P.S. Does your spouse, family member, or friend suffer from peripheral neuropathy? This offer is also available to them too. You can even come in together. Their lack of health affects your life also. Maybe this will be your chance to really give them the help they need.

P.P.S. You're smart, and you know that a doctor can never guarantee a cure from any condition, as all patients respond differently to care.

P.P.P.S. If you want more information, come in and fill out a preliminary Subjective Questionnaire, or come by for **FREE INFORMATION** about the Peripheral Treatment Program.

**Call Today!**

**Phone: 203-656-3636**
