

Testimony Against House Bill 5225

2-28-2010

My husband and I urge you to oppose RB 5225. Such a bill will prevent currently working solar installers who do not hold an E1 or E2 license. Critical green jobs will be lost. The goal of any legislative work should be to lessen the cost of alternative energy work not to increase it! Our state has been a leader in this movement, let's keep moving forward!

Thank you,

Renee and Robert Slonaker
Canaan, CT
