

Diane Zorda
HB 5212

HB 5212
Diane Zorda

My name is Diane Zorda and I live in Enfield, CT. I am a pharmacist for a company that works with people with bleeding disorders. It is always hard to see our clients being torn away from our service and notified by their insurance that they have to use an unqualified homecare pharmacy. We have seen countless patients who were receiving excellent care under our organization forced to use a company who knows nothing about their disorder. This is why I am in support of House Bill 5212.

I would like to read the testimony of one of our previous clients, Bill Browning, who was unable to be here today due to medical reasons.
