Subject: Sick leave bill

Dear Members of the Labor Committee,

I want to lend my strong opposition to the Sick Leave bill.

As Vice President for Kelly Services in Central CT I meet with both large and small business owners regularly to assess their staffing needs and support their changing business models. So many of them have trimmed costs to the bare minimum, and are fighting to stay profitable, and to stay in CT.

The last thing we need is another State mandated regulation that takes away market and company flexibility. Despite the appearance of working to serve the many - it will be a greater disservice to the citizens of CT in causing more businesses to move elsewhere!

It is time for the Legislation to stop proposing ideas that drive up business costs. Please do not approve this Sick leave proposal.
