Subject: Letter to Legislature

Dear Legislators,

My husband and I decided to purchase an outdoor wood boiler 7 years ago after having a serious chimney fire from our indoor wood stove. We have 12 acres of land and heating our house with wood is very economical for us. We use it to heat our house, hot water and our detached garage. We have never once received a complaint from any of our neighbors about the smoke affecting them. If we have to stop heating by this method and start purchasing oil again it would put an extreme hardship on my family financially. I know a lot of people that heat their homes and businesses by this method and we are all respectful of our neighbors . PLEASE do not let the minority rule the majority in this case.

Sincerely,

Lisa & Clint Roberts
Union, CT
