**Testimony of Kerry O'Neill, President of Earth Markets, LLC
Appropriations and Energy & Technology Committees Public Hearing May 20, 2010**

Good afternoon and thank you for the opportunity to address the Appropriations and Energy & Technology Committees regarding the ARRA Energy Efficiency and Conservation Block Grant program. My name is Kerry O'Neill, President of Earth Markets, a Connecticut-based social venture that develops community-based residential energy efficiency projects.

The Energy Efficiency and Conservation Block Grant monies were and are a unique opportunity for Connecticut's cities and towns. These funds should act as a force multiplier when combined with other funding sources, and they should be a down payment on long term energy plans.

I'd like to propose some recommendations for your consideration:

Accountability – the committees could conduct hearings to learn how OPM, Energy Conservation Management Board (ECMB), Connecticut Clean Energy Fund (CCEF), DSS, DECD, CDA et al are working together to maximize the state's current funding.

Future Planning – Create a standing body – perhaps a Grant Opportunity Task Force – that is ready to respond to upcoming federal energy grant opportunities and is also a place for the public to come propose innovative ideas for responding to grant requests.

Last year we came before this committee and recommended formation of a Municipal Energy Stimulus Workgroup to ensure that municipalities had all the necessary information and tools to effectively plan, apply for and implement EECBG funds. As we indicated at the time, this was the approach being taken by leading states, in an effort to ensure their states secured maximum benefits from all available ARRA programs. At the time, our hope was **that EECBG and other stimulus/ongoing funding opportunities would be maximized and best practices were shared across the state** – from program design, to implementation, to ongoing measurement & verification of outcomes. We believed, and still believe, that this was **an excellent opportunity to look at projects/programs in an objective way, studying what worked, what didn't, and why**. In that way, we could be **thinking strategically** – as a state and as community of practitioners – beyond the stimulus funding.

While we are disappointed that all the various state entities involved in energy have not come together in a formal way to seize upon this catalytic opportunity, we are grateful for the pockets of coordination and cooperation that have occurred on discrete initiatives.

We also wanted to take this opportunity to draw attention to the various funding opportunities that we've been tracking and **suggest a way that stakeholders might gauge the state's overall effectiveness in maximizing funding opportunities**. Table 1 below may serve as a template for further exploration of tracking mechanisms. It is not meant to be a comprehensive list of all federal funding opportunities, but is illustrative of the major DOE opportunities relating to energy efficiency.

The themes of the competitive grants include innovation, broad-based collaborative partnerships, financing and leverage, community & behavior, and monetization of energy efficiency with specific

reference of white tags, forward capacity markets and carbon offsets – an area that CT is uniquely qualified to compete and win. Some highlights from the table below include:

- **Competitive EECBG Retrofit Ramp-Up Program:** Topic 1 (for states and cities) announced 4/22/10, awaiting announcement of Topic 2 (for smaller communities)
 1. **No Topic 1 apps in CT – See the map on p.4 of the 25 winners sharing \$452 million.** This was a HUGE missed opportunity for the state. Property Assessed Clean Energy (PACE) financing was the big winner here.
 2. **2 CT Topic 2 apps**, including submission by CCEF on behalf of the Neighbor-to-Neighbor Energy Challenge, a program designed and convened by Earth Markets with a consortium of 14 towns and a broad-based set of program partners including CT Energy Efficiency Fund (CCEF) and Clean Water Fund – **gained the support of the entire CT Congressional Delegation**
- **SEP Competitive “Strengthening Building Retrofit Markets” Grant**, due 5/24/10
 1. CCEF program administrators CL&P and UI are working on a proposal for the ECMB. What does the proposal look like? **Does it meet the criteria for collaborative partnering, leverage, financing, innovative marketing strategies, new structures, etc.?**
- **Weatherization Innovation Pilot Grants**, due 6/2/10
 1. This is looking for new delivery models and highlights partnerships, sustainable strategies (grant leverage), community-based strategies, behavior, monetization like offsets/white tags/forward capacity markets
 2. **Is anybody in CT applying?**

Also included on pages 5-6 is a DOE printout of awards and payments by state (graciously provided by a DOE contact, as of yesterday, May 19th, 2010). This covers the ARRA formula grants for EECBG, SEP and Weatherization and indicates the total amount awarded (indicated in columns/sections marked “Obligation”) and how much of the award has been paid to states.

I thank you for your time today and the opportunity to address the members of this committee.

Table 1. CT Tracking Template for Department of Energy ARRA and Other Funding Opportunities

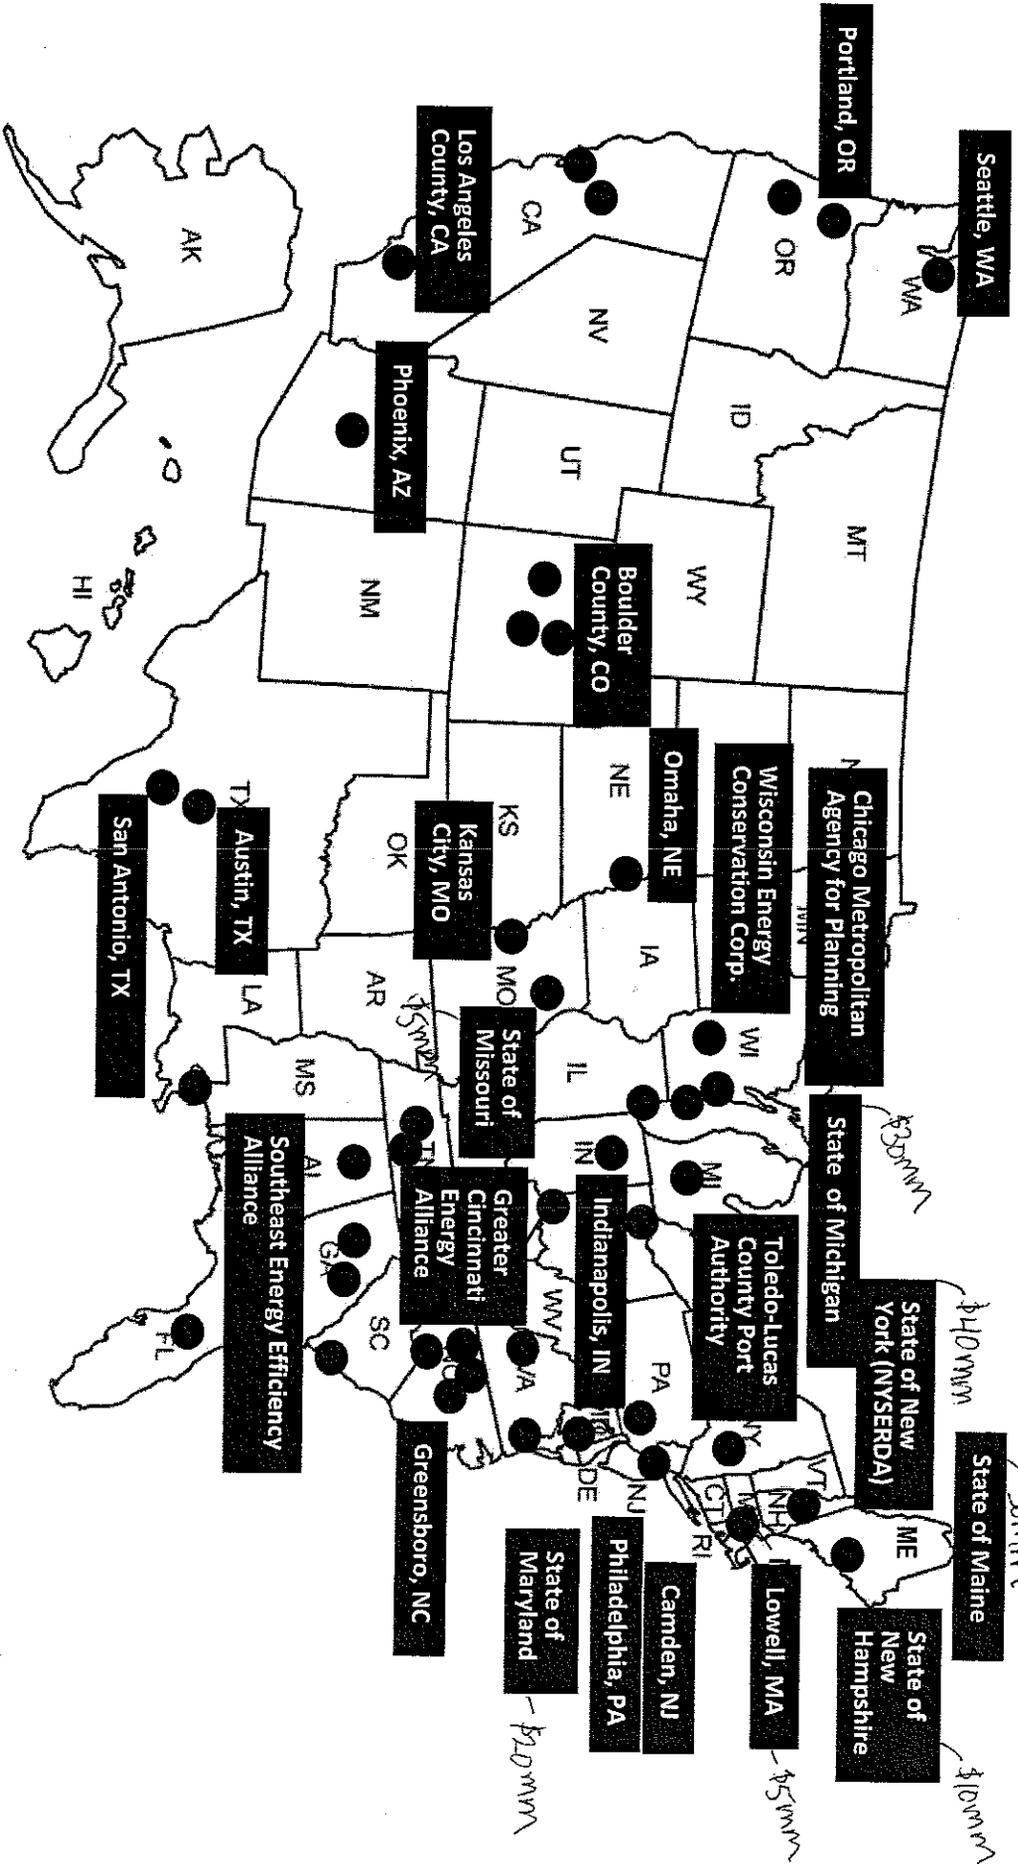

DOE Program	Grant Name	Total \$'s Avail.	# of Awards Avail.	Purpose	CT Org.(s) Applying	CT Award Made?	Notes
ARRA / EECBG	Direct formula grants to cities	\$14.9 million	26		Largest CT cities	Yes	Did all cities draw down their funds? If not, why not?
ARRA / EECBG	Direct formula grant to state for use by non-formula grant towns	\$9.6 million	1		OPM	Yes	\$8.6 million allocated to smaller towns, remainder available for regional bonus pool
ARRA / SEP	Formula grant to state	\$38.5 million	1		OPM	Yes	According to DOE, 30 states used grant dollars to seed some sort of loan program
ARRA / Weather-	Formula grant	\$64.3	1		DSS	Yes	Some portion of CT's Weatherization formula

ization	to state	million					grant was allocated to DECD
ARRA / Qualified Energy Conserv. Bonds (QECBs)	Formula grant to cities / state	???	???		Not sure who – perhaps CDA?	Yes	What types of projects are being done with these bonds? Are cities getting the technical assistance they need?
ARRA / EECBG	Competitive Retrofit Ramp- Up / Topic 1	\$452 million	25 awards, \$5 to \$40 million	For larger cities and states; Focus on deep penetration of neighborhood / community retrofits	NONE	No	Financing, leverage and collaborative partnerships were the theme, PACE was a big winner
ARRA / EECBG	Competitive Retrofit Ramp- Up / Topic 2	\$64 million	15 to 60 awards of \$1 to \$5 million	For communities under 35K (or a state, if money allocated to smaller communities); focus on innovation, partnerships, financing	CCEF (see note); perhaps 1 other?	TBD	CCEF applied for a \$4.2 million grant on behalf of the Neighbor-to- Neighbor Energy Challenge – a collaboration between 14 CT towns ¹ and a public / non-profit / for- profit / academic partnership ²
SEP	Competitive – Strengthening Building Retrofit Markets	\$23 to \$26 million	Approx. 10 awards of \$2 to \$5 million each	Transform regional resi or comm'l retrofit markets for whole-house or building retrofits, with a focus on removing barriers to widespread consumer adoption	ECMB (via utility program admins. CL&P / UI)	TBD	Due 5/24/10, emphasis on innovation, overall grant leverage, financing w/ private leverage of capital (including PACE), collaboration with broad range of public, private partners
Weather- ization	Competitive – Weatherization Innovation Pilot Program	\$30 million	10 to 15 awards, \$3 million max.	New providers and collaborative partnerships, leveraging funds, new technology, behavior and community strategies, reduced costs to deliver program	???	TBD	Due 6/2/10

¹ Bethany, Cheshire, East Haddam, East Hampton, Glastonbury, Lebanon, Mansfield, Portland, Ridgefield, Weston, Westport, Wethersfield, Wilton, and Windham

² Connecticut Clean Energy Fund, Connecticut Energy Efficiency Fund, Clean Water Fund, Earth Markets, Efficiency 2.0, Massachusetts Institute of Technology, Student Conservation Association, SmartPower, and AFC First Financial

Competitive EEC 86 - Topic 1 4452 MW awarded
Retrofit Ramp-Up: Selected Projects*

* Some projects include more than one participating city
