

Mark Waldo, Waldo Renewable Electric, LLC.
Before the Connecticut General Assembly Energy and Technology Committee
March 4, 2010
Written Testimony in support of House Bill 5362, AN ACT CONCERNING
RENEWABLE ENERGY

I own and operate a solar photovoltaics company in Old Saybrook, CT. I have supported my family for five years as a solar contractor. The funding proposed in House Bill 5326 is a sustainable way to create and maintain jobs in Connecticut. Clean energy is important to our state's economy and environment. Waldo Renewable Electric, LLC is a testament to the value of solar energy.

While my company has relied on the residential rebate funding, House Bill 5326 gives our company an opportunity to grow while also inviting many more customers to "go solar." Solar technology allows towns to use barren land, provides a stable source of revenue, helps businesses to lower energy costs, utility scale projects and provides for an additional 10,000 residential solar installations.

House Bill 5362 will help sustain the future of my business as well as other companies in Connecticut. Solar energy is important to all of us. Please support House Bill 5362.

Thanks for your time.

Mark Waldo
