

Testimony in Opposition of Raised H.B. 5466, AAC Climate Change

Before the Energy & Technology Committee
March 9, 2010

Dear Senator Fonfara, Representative Nardello, and members of the Energy & Technology Committee,

I, Edna L. Bran, write in opposition to H.B. 5466, An Act Concerning Climate Change. This bill institutes new reporting requirements for the Department of Environmental Protection and the Department of Public Utility Control on every state dollar spent to cut carbon emissions. Environmental leaders believe it will slow progress on reducing the state's greenhouse gases by bogging down overburdened and underfunded state agencies in an ill-defined series of calculations and lengthy rule-making proceedings. This bill is unhelpful and unnecessary; I urge the Committee to put it aside.

Sincerely,
Edna L. Bran
