VALVES, PIPE, TUBE, FITTINGS

February 25, 2010

To: Member of the Labor Committee

I am writing to voice my extreme displeasure to SB-63 which would require Connecticut employers to provide paid sick leave to their employees.

Established in 1981, Mahony Fittings, Inc. is a small privately (woman) owned business that despite the continual assault of governmental interference on both the national and state level, continues to survive and in some years, even thrive. This past year has been a particularly difficult one and the promises of financial recovery and stimulus monies our politicians have spoken of continue to elude us. As such, I find it preposterous that the Connecticut Legislature would once again choose to consider SB-63 in what continues to be dire economic times for small (and all) businesses. I find it equally distressing that our State Legislature seeks to interfere in the running of my company particularly when their own house is in such disrepair.

I strongly urge you to stop this nonsense and vote to defeat the passage of this fiscally irresponsible legislation once and for all. Your efforts should be directed towards promoting and protecting the interest of the business owners in this state as we are the ones who are CONTRIBUTING to the tax base.

Sincerely,

Sheila C. Mahony
President
