**Concerning
Psittacine Birds**

SUBJECT MATTER OF REGULATION

Sec. 1. Section 19a-36-A23 of the Regulations of Connecticut State Agencies is amended to read as follows:

19a-36-A23. Regulation of traffic in psittacine birds.

- (a) [Persons who import, purchase, breed, sell, exchange, barter, give away or otherwise deal in psittacine birds shall keep records of such transactions embodying information required by the state department of health for a minimum period of two years, which records shall be open for inspection by the local director of health or a representative of the state department of health.] "Psittacine birds" means, unless otherwise specified, all birds commonly known as parrots, macaws, cockatoos, lovebirds, parakeets, cockatiels and all birds of the order psittaciformes.
- (b) [All *** parakeets imported, purchased, sold, exchanged, bartered or given away shall be closed metal seamless banded with a band identifying the breeder by whom they were bred.] Any person or entity that imports, purchases, breeds, sells, exchanges, barters, gives away or otherwise deals in psittacine birds shall keep records of such transactions embodying information required by the Department of Public Health. For each bird, records shall include:
- (1) The date of bird's arrival on premises;
 - (2) A description of the bird (i.e.: species, common name, variety);
 - (3) The unique identifier consistent with the leg band or microchip;
 - (4) The name, address and phone number of the prior owner of the bird; and
 - (5) The date and a description of the final disposition. If the final disposition is a change of ownership, the records shall also include name, address and phone number of the person accepting ownership of the bird.
- Such records shall be open for inspection by the local director of health, a representative of the Department of Public Health, a local animal control officer, or a representative of the state Department of Agriculture. The records shall be kept for the period of time commencing on the date of the bird's arrival on the premises and continuing until two years following the date of final disposition of such bird.
- (c) [All *** parakeet breeding stock shall be closed metal seamless banded.] Except as provided for in subsection (f) of these regulations, all psittacine birds, except parakeets, that are imported, purchased, sold, exchanged, bartered or given away shall be banded with a metal leg band that has a diameter adequate for the species. Said band shall contain a unique identifier for each individual psittacine bird. The leg band design may be closed, or opened (seamed) provided that it is tamper evident. This subsection shall not prohibit the use of a unique identifier for parakeets.
- (d) [Each person intending to breed psittacine birds shall file written notification of such intent with the local director of health and the state department of health before engaging in such procedure and annually thereafter on January first.] A microchip that includes the unique identifier for each individual psittacine bird may be used in place of a leg band. An appropriate microchip reader shall be available at any pet shop licensed pursuant to section 22-344 of the Connecticut General Statutes where a psittacine bird is normally kept.
- (e) [When illness occurs among the psittacine birds or in case of suspected human psittacosis, local directors of health shall quarantine all birds suspected of psittacosis until considered safe.] Any psittacine bird imported into Connecticut shall be accompanied by a health certificate signed by a veterinarian licensed in the state or country of origin certifying that such psittacine bird was healthy before shipment and had no known exposure to avian chlamydiosis in the 60 days preceding the date of issuance of the health certificate. The certificate shall include the date of veterinary inspection, and for each psittacine bird the description (i.e. species, common name, variety), and source including name, address, and phone number of the prior owner. The unique identifier as it appears on the leg band as described in subsection (c) of these regulations or the microchip as described in subsection (d) of these regulations shall be present on either the health certificate accompanying the psittacine bird or a document attached to the health certificate. If the unique identifier is located on a document attached to the health certificate, the health certificate shall indicate where on the attached document the unique identifier is located.
- (f) [In case of suspected psittacosis, the local director of health or a representative of the state department of health shall have the right to confiscate as many of the suspected birds as necessary to provide a sufficient sample for laboratory testing. If laboratory examination shows the presence of psittacosis virus, the remaining birds shall be killed and burned by the owner or other person in charge of such birds immediately on notification of such finding.] The breeder of any parakeet imported, purchased, sold, exchanged, bartered or given away shall be indicated on either:
- (1) A metal leg band that has a diameter adequate for the species that may be closed, or opened (seamed) provided that it is tamper evident; or
 - (2) A microchip provided that an appropriate microchip reader shall be available at any pet store licensed pursuant to section 22-344 of the Connecticut General Statutes where a parakeet is normally kept.

STATE OF CONNECTICUT
REGULATION

Department of Public Health
Name of Agency

Such breeder shall also be identified on records required pursuant to subsection (b) of this section and the health certificate required pursuant to subsection (e) of this section except that on any document where said sections require a unique identifier the name of the breeder shall be included in lieu thereof.

- [(g) Every person having the custody or care of any birds of the psittacine family shall notify the local director of health and state department of health immediately regarding any unusual illness or death among such birds.
- (h) Birds not of the psittacine family are to be regarded as dangerous when they have been exposed to psittacosis and, after such exposure, shall be quarantined for three weeks and killed and burned by the owner or other person in charge of such birds if they develop or appear to develop symptoms of the disease.
- (i) No indemnity will be paid the owner or other person in charge of such birds for destroyed birds.
- (j) Any shipment of psittacine birds into Connecticut for sale in Connecticut shall be accompanied by a certificate signed by a veterinarian certifying that the birds have been treated with chlortetracycline, or other approved medication, prepared and administered in accordance with procedures approved by the surgeon general of the United States Public Health Service or psittacine control.]

Statement of Purpose: The purpose of these regulations is to (A) change the banding and other identification and record keeping requirements for psittacine birds (B) by changing the acceptable form of banding and providing alternative options for identification as well as detailing the required records for owners of psittacine birds (C) by amending 19a-36-A23 of the Regulations of Connecticut State Agencies.

Be it known that the foregoing:

Regulations Emergency Regulations

are:

Adopted Amended as hereinabove stated Repealed

By the aforesaid agency pursuant to:

Sections 19a-36 of the General Statutes.

Section of the General Statutes, as amended by Public Act No. of the Public Acts.

Public Act No. of the Public Acts.

After publication in the Connecticut Law Journal on July 7, 2009 the notice of the proposal to:

Adopt Amend Repeal such regulations

(If applicable): And the holding of an advertised public hearing on

WHEREFORE, the foregoing regulations are hereby:

Adopted Amended as hereinabove stated Repealed

Effective:

When filed with the Secretary of the State.
