

Dear Educators and Representatives, I write to you to testify today that we need to cut tech funds such as the inflated salary we are paying a very ineffective system and SCSU CIO. Furthermore, we are buying Microsoft Software (because Wendy Chang supports it wholeheartedly) and we could easily do as good a job with Open Office (which is free). The same is true for her use of Blackboard products. Lastly, we are paying for technology without pedagogical leadership. This may be cost effective as a business model, but it doesn't work to establish 21st century literacy on my campus. Please support our state system and continue to root out ineffective leadership with my support. Please do not cut or decrease funding for students and learning resources. Sincerely,

--

Will Hochman
