

March 29, 2011

Senator Toni Harp,
Legislative Office Building
Room 2700
Hartford CT

I am so fed up with the economic climate and jobs outlook here in Connecticut as I am sure you are; the picture continues to deteriorate, as workers we are more at risk than ever before. My paycheck cannot keep up with the increases in fuel for my car to get to work, or the cost of fuel to heat my home; proposed increases in taxes are going to take yet another bite out of the little I have left each pay period. Sorry to vent I am sure you hear about this every day.

Today I share with you my concerns with respect to HB 6446 a video licensing bill, legislation that can bring more money into the state and properly protect all the Connecticut residents as well. The act concerning registration for public service technicians and certified video service providers is really needed; I was shocked to learn that most workers that do this work do not have to be licensed by the state.

How much money in license fees has been lost? How can this help the State of Connecticut is the question I have asked myself? The answer is that yes it will help. We have to start somewhere I see this bill as a good start.

Your vote in support of HB 6446 will be a good move for the people of the state. I ask that you vote yes for House Bill 6446.

Thank you,

Brian R. Stevens
