Hi I am writing to you in regards to Governor Malloy announcement of colleges and how he may be cutting funding. I would like to say I am very disappointed in this and there is defiantly other area which we should be cutting back in. I recently just started back to school I work 55 hours a week and go to school part time to try to make a difference in my life. Currently I work in a doctors office I see tax paying money being spent at its best. I see patients coming and going on state insurance trying to get pregnant. So I ask what is wrong with this picture but hes talking about cutting back education where people are trying to make a difference in their lives. Prior to this job I use to work in the pharmacy as a technician and there I saw our tax money at its best when the state announced people would have to pay \$1.00 for there scripts but these Pt's also knew they did not have to pay it and we were still required to give them there scripts. So I ask when are we going to stop spending money foolishly on people who are working the system and start helping people who are working to make a difference in their lives. So I am asking you to speak for your constituents and say no to cutting school funding for people who are trying to make a difference.

Thank you
