

Gentlemen:

As a long standing member of the North Haven Lions Club, I ask you NOT to eliminate the Board of Education Services for the Blind.

The suggestion that merging this into a new entity, as HB 6380 and SB1012 would do, would result in the complete elimination of the services now provided by BESB - it would not merely result in a scaling down of these services. No other entity provides them.

A morality of a society is measured by what it does for those of its members who cannot do for themselves. How do you feel Connecticut should be viewed in this regard?
