

As the parent and a friend of families with children who are autistic, I am writing to oppose SB 1105. Only those qualified/trained to provide ABA services should be allowed to provide them to our children. Being certified in another discipline doesn't qualify you to provide these services, and as a result may cause lifelong damage by delaying the learning process. We should be supporting families and children, not causing them additional stress wondering if those who are teaching their children are qualified.

Thank you.
