2/8/10

Senator Edward Meyer, Representative Richard Roy and members of the Environmental Committee

In regards to Bill #RB832 An act concerning the protection of inland wetlands watercourses. I am opposed to this bill.

This bill puts more regulation on the forest industry. We can't absorb much more regulations. Please consider that I employ 10 people plus sub-contractors and generate sales tax revenue for the State of Connecticut. We don't need new regulations; enforce the ones you already have in place.
