

THE ENERGY AND TECHNOLOGY COMMITTEE

Senate Bill 200: Geothermal Renewable Energy Credits

Answer to questions from the Public hearing dated February 10, 2011

The question was raised as to the present cost of renewable energy credits to both the UI and CL&P of biomass from Maine or other nearby states.

We were able to ascertain that the cost of credits for class 1 renewable resources from Maine were \$33.00 per credit for 2010 and \$24.00 per credit for 2009.

In Connecticut we ascertained that the cost of credits for class 1 renewable resources were \$32.00 per credit for 2010 and \$25.00 per credit for 2009.

The credit requested in the above stated Bill 200 for Geothermal Renewable Energy is \$30.00 per credit.
