RE: S.B. No. 255

AN ACT CONCERNING SOLAR RENEWABLE ENERGY CERTIFICATES

Energy & Technology Committee

February 10, 2011

Dear Co-Chair's Fonfara and Nardello,

I would like to thank you and members of the committee for allowing Alteris Renewables to submit testimony in regards to proposed Senate bill number 255, sponsored by Sen. Gayle S. Slossberg, 14th Dist. We would like to thank Sen. Slossberg for sponsoring this bill. Alteris Renewables is the largest renewable energy installer in the northeast and we have two of our regional offices located in Stonington and Wilton, CT with our qualified team of solar installers. Other northeast states have adopted strong solar energy laws and have developed financial programs that have created strong markets for the industry to grow. The Energy & Technology committee has been very instrumental in advancing renewable energy development in Connecticut. Passage of this bill will allow the solar industry in Connecticut to further its development, in making these projects viable throughout the state for residential and business owners.

Sincerely,

Bob Chew

Founder,

Chief Sustainability Officer
