To: The General Law Committee

HB 6446 AN ACT CONCERNING REGISTRATION REQUIREMENTS
OF PUBLIC SERVICE TECHNICIANS AND CERTIFIED
COMPETITIVE VIDEO SERVICE PROVIDERS.

The standardization of the delivery process by suppliers in the state of Connecticut is essential to the protection of our consumer base. So the passing of this bill then proves to be a win win situation for suppliers and consumers. Our Senator, Richard Blumenthal has stated many times that we should only hire licensed contractors for any type of contracted work, (i.e, electrical, plumbing, roofing, remodeling, etc.), so as to protect ourselves from shoddy or unprofessional work performed at our homes or business. Why should we expect any different from cable, telecommunication, satellite, or any video provider of services. We are continually bombarded with new technologies and we should expect that the installation of those services should be installed by a licensed or regulated or certified installer that proves some type of education or instruction was provided before any company gives orders to anybody in a truck to go and install any product. I urge the passing of this bill.

Respectfully submitted
